

Are there subsidies for small-scale solar power generation

What is a solar rebate or subsidy?

A rebate or subsidy will cover part or all of the upfront cost of buying solar or a battery. Rebate schemes operated by states, territories and local governments sometimes only apply to particular groups of people or types of housing, such as social housing, rental properties or apartments. Eligibility criteria may relate to:

Do you qualify for STCs for rooftop solar?

Eligible installations of rooftop solar are entitled to STCs, creating a subsidy for households and businesses that install these renewable energy technologies. Most home and business rooftop solar systems in Australia qualify for STCs. When you install or upgrade a rooftop solar system, you will receive a certain number of STCs.

How can I save money on a rooftop solar system?

There are government subsidies, rebates and loan options that can help you pay for rooftop solar or an associated battery for your home or business. You can save money on a rooftop solar system for your home or business through a range of government assistance schemes.

Can a house replace a rooftop solar system?

A house replaces its original rooftop solar system in its entirety. This includes removing the original system to install a new inverter and panels. The new system will be eligible if: all components meet the current relevant standards. A house replaces some of the panels in its existing rooftop solar system.
