

The city's new hybrid energy storage project bidding initiative combines solar power, battery storage, and smart grid technologies - a blueprint for urban energy transformation. Let's explore what this ...

Energy storage and grid modernisation are two key technologies that must be used in tandem with renewable energy development. Widely known by the acronym BESS, battery energy ...

This includes preparing the infrastructure and regulations needed for hydrogen energy use, increasing the capacity to supply raw materials for sustainable aviation fuel (SAF) production by ...

ASEE - ASEAN Smart Energy & Energy Storage Expo 2026 is your gateway to these opportunities. Taking place March 25-27, 2026 in Bangkok, ASEE brings together leading manufacturers, ...

With ongoing deployment of variable renewable energy technologies, such as solar and wind power, the opportunities for energy storage projects will increase. Long-term plans to liberalise ...

Power Grid Corporation of India has won a 2,000 MWh battery energy storage project in Andhra Pradesh under tariff-based competitive bidding. The BOO project, backed by viability gap ...

ASEAN (Bangkok) Energy Storage & Smart Energy Expo 2025, coming on March 5-7 in Thailand, has seen remarkable progress in its media partnerships and participation.

EGAT undertook some studies on the potential for energy storage and is piloting three battery energy storage installations. One is located alongside a solar project in Mae Hong Son Province to improve ...

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings and power generation.
