Solar power is bringing new life to communities. It's creating jobs, supporting schools, and giving landowners new income. Projects like Bayou Galion show how solar energy can power ...

Solar Energy Purchase Agreement between 1803 and Bayou Teche Solar, LLC ("Bayou Teche"), effective as of March 4, 2021 (a 20-year PPA for 95 MW aggregate nameplate capacity, AC solar ...

The Louisiana Public Service Commission has approved a large-scale solar energy project in Morehouse Parish as part of a new power agreement involving rural electric cooperatives.

Treaty Oak Clean Energy recently announced it entered into agreements with the technology company Meta for two utility-scale solar projects totaling 385 MW in Louisiana.

The project commenced operations in November 2024. Solar energy investments in Louisiana are growing, driven by increasing demand for electricity from manufacturing and data centers.

The project, which began operations in November 2024, provides enough electricity to power 20,500 homes annually and generates significant tax revenue for the local community.

Bayou Galion Solar is an operating solar photovoltaic (PV) farm in Morehouse Parish, Louisiana, United States.
