

Battery testing london

What is a battery testing service?

Our battery testing services are applicable to an extensive range of applications such as electric vehicles, stationary batteries, grid storage, grid balancing, backup applications, uninterruptable power supplies (UPS), medical devices, e-bikes etc.

Where can I get a battery tested?

You can get a battery test at any hardware store or swing by a mechanic or auto parts store and they will likely test it out for you for free.

What services does a battery development company offer?

This can include collection, setup and build, testing, tear down, post-test analysis, and recycling. In addition to independent testing, we offer material development and testing to deliver battery architecture you can depend on. You can get your product to market faster with our unparalleled speed of development and thorough testing.

What is a lithium-ion battery test?

This includes destructive and non-destructive testing of cells, modules, and high-voltage packs, to replicate the challenging and potentially destructive conditions that lithium-ion batteries are subjected to during their lifecycle.
