

Berlin solar Glass Project

The cube berlin project is no ordinary, glass-covered building. The all-glass design presented multiple challenges, including energy concerns and structural requirements. That's where Saflex PVB ...

To achieve this goal, solar systems with an output of around 4,400 megawatts peak need to be installed on Berlin's roofs: on detached and semi-detached houses, commercial buildings, apartment buildings ...

The east-west-roof was built before the opening of the new line, the bracket buildings and the north-south-roof were erected during running operations of the train station. On the east-west roof 780 ...

Saflex Acoustic and Saflex Structural are featured in cube berlin, solving solar concerns in a unique design with the double-skin facade.

What makes it so ground-breaking is the AI developed exclusively for cube berlin; the system's "brain" connects all the technology used throughout the building and makes cube berlin truly "smart". ...

In this pv magazine Webinar, quality assurance experts from PI Berlin examine how this glass breakage occurs, and what can be done in the early project stages to mitigate it during project ...

Contrary to conventional wisdom, the fully glazed facade of cube berlin is highly energy efficient due to its osmotic skin and thoughtful design that includes a pioneering application of solar coatings on the ...

In collaboration with our project partners, GARBE Renewable Energy - GREEN GmbH and der Heliatek GmbH, the innovative solar film project was inaugurated in Berlin ...

Anyone passing through Washington Platz in Berlin can't fail to notice "cube berlin". An eleven storey, 19,000 square feet, perfect cube of a building, that features a unique double-skin glass facade.

The photovoltaic generator with a total area of 3311 m²; shall be integrated in the area-covering structure flush with the adjacent single glazing of the glass roofing of the new Lehrter ...
