

Brazil's latest energy storage battery project

WEG announces the construction of a new manufacturing plant dedicated to the production of battery energy storage systems (BESS) in Itajaí, Santa Catarina. The facility will be the most ...

WEG has announced the development of a new manufacturing facility dedicated to battery energy storage systems (BESS) in Itajaí, Santa Catarina, Brazil. The advanced plant will ...

The Brazilian National Bank for Economic and Social Development (BNDES) has approved financing of R\$280 million (\$54 million) under the BNDES Mais Inovação program for WEG to ...

Brazil's push to integrate energy storage into its power system is moving from pilot deployments toward industrial scale, with WEG confirming plans to build a dedicated battery energy ...

Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.

Brazil launches a 2026 energy storage auction to boost large-scale battery projects and define storage's role in its evolving power market.

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

The official Federal Government mission to Asia aimed to attract international investors for the first battery auction, which the Ministry of Mines and Energy originally planned to hold later this year, ...

Brazil's capacity reserve auction for battery energy storage systems (BESS), first anticipated in 2024, moved closer to execution in 2025 as projects advanced and auction rules were...

Companies such as Statkraft, CGN, and Elera Renewables have announced plans to develop battery energy storage system (BESS) demonstration projects in Brazil, positioning ...
