

Challenge Cup Solar Power Generation

Now in year six of the U.S. Department of Energy (DOE) competition administered by the National Renewable Energy Laboratory, the Solar District Cup challenges multidisciplinary student ...

“These competitors represent the next generation of talent to support the growing solar sector that is needed to meet the country's clean energy goals. There is great creativity, innovation, and ...

The Solar District Cup is a collegiate competition that challenges student teams to design and model distributed solar energy systems.

The team designed 16 rooftop solar arrays featuring more than 2,500 high-efficiency solar panels and one canopy shade structure to offset the grid-consumed energy from 30 campus ...

Now in its third year, the Solar District Cup aims to inspire a new generation of renewable energy innovators to create distributed energy systems that support a flexible, resilient power grid. ...

This is the second year in a row that App Solar has taken 1st place in their district, highlighting the practical impact of the team's innovative approaches and their contribution towards ...

Diverse students in engineering, urban planning, finance, sustainability, communications, and related majors will form teams to reimagine how energy is generated, managed, and used.

WHAT IT IS: The Solar District Cup is a collegiate competition that challenges multidisciplinary student teams to design and model distributed energy systems for a mixed-use campus or district--groups of ...
