

China's high-end solar power generation equipment

Solar surged 64% in H1 2025 with 380 GW added worldwide, led by China's record pace, keeping 2025 on track for new highs.

Exhibit A is the Chinese solar manufacturer LONGi Green Energy Technology, which has just unveiled a new 670-watt module with a conversion efficiency of 24.8% at a showcase in Anhui, ...

China's wind and solar power installed capacity totaled 1,840 GW at the end of 2025, according to data released by the National Energy Administration yesterday.

In China, the solar equipment industry is not only pivotal for domestic energy needs but also plays a significant role in the global market. This guide delves into the intricacies of solar ...

Midong features 5.26 million 650-W monocrystalline bifacial double-glass photovoltaic (PV) panels. The facility's infrastructure includes more than 1.23 million supporting piles, five 220-kV...

Developed independently by DEC, the turbine unit is the highest-altitude of its type in China, marking a significant advancement in the country's capability to develop and manufacture large-scale ...

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the...

China's solar generating capacity is expected to surpass coal for the first time this year, according to the country's top electricity industry group, marking a milestone in the country's ...

The official document outlines multiple development targets for the 2025-2026 period, including an average annual revenue increase of approximately 6 percent in traditional power ...

The power station is located in Wanning City, Hainan Province, China, and is supplied by Trinasolar. The project adopts Trinasolar's Vertex N 700W series modules, with an average annual power ...
