

# Cumulative installed capacity of energy storage projects

Across all segments, 15 GW of storage is expected to be installed this year, marking a 25% increase over 2024. "Activity has been strong and our forecast for this year has expanded," said ...

This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest capacity installation in a single year since 2002. Together, solar and battery ...

Find the latest statistics and facts on energy storage.

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...

Among these, the cumulative installed capacity of non-hydro energy storage surpassed 50 GW for the first time, reaching 55.18 GW/125.18 GWh. Power capacity grew by 119% year-on ...

The operating capacity of battery storage in the US grew by 7.9GW last year, bringing the country's total cumulative installed base to 17GW by the end of 2023.

New York, October 12, 2022 - Energy storage installations around the world are projected to reach a cumulative 411 gigawatts (or 1,194 gigawatt-hours) by the end of 2030, ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Energy storage installations globally will keep gaining momentum over the next decade as other markets pick up pace. BloombergNEF expects cumulative energy storage capacity in 2035 ...

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...
