

Data Center Rack 2MWh Direct Sales

What is the data center rack market?

The data center rack market encompasses the design, manufacturing, and deployment of physical racks, cabinets, and enclosures used to house IT equipment, including servers, storage devices, and networking components. This market includes vendors offering solutions for rack-level power distribution, cooling, security, and monitoring.

How big is the data center rack market in 2024?

Full racks delivered 57.4% of the data center rack market in 2024 and will outpace other sizes with a 12.9% CAGR to 2030. That share equates to a commanding portion of the data center rack market size and reflects hyperscalers' preference for 42U footprints that streamline cabling, airflow, and PDU standardisation.

What is the data center rack of Europe market?

The data center rack of Europe market is characterized by a blend of mature markets in Western Europe and emerging markets in Eastern Europe. The region places a strong emphasis on data security, compliance, and energy efficiency, influencing the demand for state-of-the-art rack solutions.

Which country will dominate the data center rack market?

North America is projected to dominate the data center rack market, driven by strong cloud adoption across the enterprise and public sectors, the rapid integration of AI, machine learning, and IoT workloads, and the aggressive expansion of hyperscale and colocation data centers. Major hyperscalers are investing heavily in infrastructure.
