

Decorative frame paving photovoltaic panels

Smarter, Greener Architectural Solutions Seves transforms the already eco-friendly glass block into a new building instrument, ideal for accenting exterior application and landscaping projects. Illuminate ...

Solar pavers are a revolutionary building material that combines the durability and functionality of traditional paving with the sustainable power generation of solar panels.

It is composed of five multifaceted fa#231;ades, each clad in a dynamic checkboard of glass and photovoltaic panels. The panels are installed at different inclinations, depending on the orientation of the fa#231;ade, ...

PLATIO solar paver is a walkable, green building material. In our solar pavers, high-performance solar cells collect the solar energy radiated onto the surface. The solar cells are protected by heavy-duty, ...

These cells are shielded by durable glass panels, engineered to resist slips, scratches, and impacts. A sturdy frame structure ensures both the load-bearing capability of the walkable solar panel surface ...

Solar pavement is both a useful element and a jewel in any home. It is also an excellent solution for paving walkways, terraces or driveways. The solar paver is ideal for residential buildings ...

PLATIO solar pavers come with two types of glass (Clear and Opal) and two different high performance solar cells (monocrystalline and polycrystalline). Both glasses are tempered and have anti-slip ...

As an innovative application of BIPV, photovoltaic floor tiles seamlessly integrate with ground landscape designs, serving as both decorative materials and green energy carriers. They ...
