

District floor photovoltaic panels

Currently, Ankara Solar offers two standardized sizes of flooring: a 30-watt panel measuring 420 mm and a 120-watt panel measuring 820 mm. They are designed to be used for ...

Each model features specific power outputs, efficiency rates, dimensions, and temperature coefficients, suitable for different installation needs and operating conditions, ensuring versatility in solar energy ...

We Are Mainly Engaged In R& D, Production And Sales Of PV Modules And Lithium Batteries, As Well As Providing Customers With Solutions For Solar Energy Projects.

Designed for installation on pavements, cycling tracks, and public areas, these innovative floor tiles combine solar energy generation with durable paving materials, creating sustainable urban energy ...

The developed PV floor can generate power and reduce the material utilization, providing an innovative and green solution to integrate sustainable energy technologies into ...

PVFloor provides both energy saving and an aesthetic solution with its innovative energy-generating solar panels used as floor covering. With its durable and efficient structure, PVFloor can be used in ...

Our Solar Walkway is a smart data floor designed to promote renewable energy in the public domain. The floor is installed in urban environments to make the production of renewable energy visible.

It uses high-efficiency photovoltaic cells within a durable, walkable surface. It features a textured, anti-slip finish, ensuring durability and safety for pedestrian traffic.
