

# Do Indians use solar energy to generate electricity

India is well positioned to execute its plans to leverage solar power to meet a substantial portion of its energy needs by 2032, backed by government initiatives and investment in technology.

Solar photovoltaic power can effectively be harnessed providing huge scalability in India. Solar also provides the ability to generate power on a distributed basis and enables rapid capacity addition with ...

Solar power is energy from the Sun that is converted into thermal or electrical energy. China, the USA, and India have the world's richest solar energy sources. India receives solar ...

As per Renewable Energy Statistics 2025 by IRENA, India ranks 5th worldwide in total electricity energy generation from renewable energy sources and holds the 3rd position in electricity generation from ...

India is in the middle of a major shift in how it generates electricity as solar installations continue to rise at a pace that has surprised even power sector planners.

As of 2025, it is now India's third largest source of electricity behind hydro. This graph charts India's solar power growth relative to the equivalent total electricity demand of other nations. Solar power is ...

India has the world's third-largest installed solar capacity and plans to reach 280 GW by 2030. This is supported by favourable government policies that capitalise on the country's geographic and ...

Rapid solar deployment. In 2012, China had negligible solar generation. In 2025, solar accounted for 9% of India's electricity generation, up from half a percent a decade earlier. India has a ...

Landmark programs like the PM-KUSUM scheme for farmers, rooftop solar subsidies, and the expansion of solar parks in states like Rajasthan, Gujarat, and Karnataka have played a key ...

Additionally, PM-KUSUM and PM Surya Ghar Muft Bijli Yojana are accelerating solar adoption among farmers and households. These efforts, supported by substantial government ...
