

Does the store use solar power

Relying on traditional energy sources can leave your retail store vulnerable to price fluctuations and grid outages, but switching to solar power can greatly reduce your reliance on the grid and improve ...

This narrated video explains how putting solar on all of America's ...

Adding solar power to your retail store comes with a variety of benefits and incentives. Smaller local operations and big-box stores alike can save money, increase profitability, and gain the support of ...

Learn how to integrate renewable energy technologies, such as solar, wind, geothermal, and biomass, into your retail store to save money and reduce your carbon footprint.

This narrated video explains how putting solar on all of America's warehouses and superstores could produce enough electricity to power 22% of all the households in America.

This convergence of rising energy costs and environmental consciousness has created a perfect storm that's driving smart retailers toward solar power. Solar energy offers retail businesses a ...

Publix Super Markets, which first installed rooftop thin solar panels in its Publix GreenWise Market stores, today has solar installations in four of its stores. The retailer also has a ...

From cutting down electricity bills to showing customers a commitment to sustainability, solar power offers grocery stores a range of advantages. I'm excited to dive into how this clean energy source is ...

For example, Whole Foods in Brentwood, Calif., now uses solar energy for almost one-quarter of its power needs, and its Edgewater, N.J., store boasts 14,000 square feet of solar panels.

If a solar installation is big enough, not only could it power the store, but the supermarket could "sell" electricity back into the grid and receive credit towards future power needs, while also helping to ...

Reduced Operating Costs
Increased Profitability
Boosted Marketing
New Potential Product Lines
Added Building Value
Some retailers have the opportunity to take this marketing impact even further with the inclusion of new product lines that tie into their commitment to going green. From solar-powered products like outdoor lighting or battery-charging systems to other eco-friendly product lines, a store that walks the walk with alternative energy can expect consum...
