

Double-sided double-glass 670 modules

These modules consist of N-type, half-cut multi-busbar wafers for efficient current collection. Double-glassed structure has a 30-year power output guarantee. The Vertex N series can be used for both ...

High-Performance Mono-crystalline Cells: Featuring 132 cells arranged in a 6x22 configuration, each cell measuring 210x105mm, our panel delivers exceptional performance with a maximum power output of ...

Double-sided power generation, higher income The dual-glass module has a bifaciality up to 90% and a power generation gain of 7%-30% on the back side.

Combining the gettering process and double-sided n -Si to maximize cell efficiency and module power. More stable power generation performance and is even better in hot climates. Bigger power ...

Based on 210mm silicon wafer and 132 half-cut mono-crystalline PERC cell, the Evo 6 Series photovoltaic panels comes with several innovative design features allowing higher output power up ...

Cell size 182mmx182mm Type Bifacial, Double-glass, N-TYPE Panel Efficiency 27.3% Place of Origin

Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics.

In the ever-evolving world of photovoltaic technology, double glass solar modules are emerging as a game-changer. By encapsulating solar cells between two layers of glass, these ...

The FX-M966GF series solar modules feature advanced 12BB half-cut bifacial technology with double glass construction and large 210mm mono cells, delivering superior performance for commercial and ...

Double-sided double-glass 670 modules
