

Eliminated solar power generation

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach ...

Despite the Trump administration's wide-ranging attacks on renewables like wind and solar power, the clean-energy industry is on pace for record growth this year, according to ...

The unfortunate result is that the state has so much solar generation at peak hours that the grid operator must curtail 29 percent more electricity than it did in 2023.

But while those in the solar power industry are cautiously optimistic about its future, there are still ways the Trump administration could undermine the Solar for All program.

Since taking office, the Trump Administration has paused permits on all new wind and solar projects on public land, both onshore and offshore. New wind and solar power installations, and ...

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has ...

A reliable grid infrastructure is essential to support intermittent solar energy generation, which some regions lack. Furthermore, the development of energy storage solutions is critical for ...

With the solar rooftop tax credits set to expire in December, there has been a scramble to install, and some solar installers say they are having to turn away customers.

The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of residential and utility-scale solar while undermining the ...

Despite the Trump administration's wide-ranging attacks on ...

While gas generation is in a renaissance, Groom says the U.S. solar boom of recent years has suddenly stalled. Indeed, the boom may already be fading amid decisions by an array of solar...
