

It was an engaging discussion on one of the most important topics in Africa's energy transition: how we can move from importing solutions to developing local capability in battery storage ...

President Bola Tinubu has disclosed that the Nigeria-Grid Battery Energy Storage System will benefit from a planned \$500 million facility from the African Development Bank (AfDB). ...

To reflect recent data and policy developments, a periodic update of the Energy Transition Plan was undertaken to develop the Nigeria Energy Transition and Investment Plan (ETIP) 2.0.

In this interview, she unpacks policy gaps, breakthroughs needed for Nigeria's green transition, the role of IoT, energy storage, and smart grids in stabilising Africa's power supply.

Nigeria's drive for a stronger, more reliable energy sector received a boost as the African Development Bank (AfDB) announced a \$1.2 million grant to launch the Battery Energy Storage...

"The feasibility study being inaugurated today will provide a detailed technical, regulatory, financial, and environmental analysis of the deployment of battery energy storage systems in...

This report delves into an innovative solution--Battery Energy Storage Systems (BESS)--that holds the potential to transform Nigeria's energy landscape by stabilizing the grid and ...

Significant investments are required in energy storage and emerging technologies, with battery energy storage systems needing 137 GW of capacity and hydrogen infrastructure requiring 36 GW. 72% of ...

Set up unambiguous policies and incentives such as tax exemptions, subsidies, and advantageous tariffs for energy storage projects so as to encourage the adoption of BESS.

The Federal Government has initiated plans to deploy renewable energy battery storage systems to enhance the stability of the national electricity grid.
