What is the battery storage Europe platform?

BRUSSELS, Belgium (Tuesday 1 July 2025): SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative to drive forward the business case and regulatory framework for battery storage across the European Union. Juhi Dion Sud, newly appointed Head of the Battery Storage Europe Platform, said:

How many battery energy storage systems are there in the EU?

Dion Sud continued: "The EU currently has just over 50 GWh of battery energy storage systems (BESS). To stay on track for the 2030 renewables targets, this must increase to between 500 and 780 GWh. Our core ask: 10X more battery storage in 5 years."

Who can participate in the battery storage Europe platform?

Participation in the Battery Storage Europe Platform is open to members of SolarPower Europe. Strategic Partnership opportunities are also available for organisations interested in taking a leading role in the work of the Platform. Get in touch to explore your involvement with the Platform.

What is the European market outlook for battery storage?

The move builds on the success of SolarPower Europe's annual European Market Outlook for Battery Storage, an established point of reference in the energy sector. Dion Sud continued: "The EU currently has just over 50 GWh of battery energy storage systems (BESS).

From the automotive industry to home energy storage systems, the demand for high-performance batteries continues to rise, driving technological advancements and fostering a host of ...

This edition of the EU Battery Storage Market Review also highlights the state of Europe's battery manufacturing industry. While the EU has built a substantial industrial base across materials, ...

As global demand for sustainable energy solutions grows, Europe's battery manufacturing industry is undergoing unprecedented development. From the automotive industry to home energy storage ...

Get profiles of Europe Battery companies - leading, established, and top emerging players - with analyst insights, competitive matrices, and strategic positioning details of these firms.

After years of being a niche component of the energy transition, batteries are now entering the mainstream of power markets. Record deployment numbers, driven by renewable ...
