

# Fish-light complementary photovoltaic panel bracket drawing

The utility model discloses a mounting bracket for a photovoltaic power station complementary to fishing and light, which comprises a load-bearing rod, a triangular bracket, a...

The main function of the fishing light complementary photovoltaic bracket is to erect the supporting structure of photovoltaic panels above the water surface of the fish pond.

Photovoltaic Power Generation and Fishing Light Complementary Mounting Bracket/Steel Structure, Find Details and Price about Bracket Structure from Photovoltaic Power Generation ...

In order to ensure the safety, stability and reliability of the mounting system for fishery photovoltaic, the whole support structure of the solution adopts the light and high strength ...

The utility model belongs to the technical field of the complementary photovoltaic module of fishing light, especially, relate to the equal adjustable complementary photovoltaic module ...

In practical applications, the design of fishing light complementary brackets requires specific analysis and design based on specific application scenarios and actual needs.

Project Content: The fishing and light complementary photovoltaic power station uses the vast area of the fish pond to install solar panels on it to generate electricity.

The utility model relates to the technical field of fishing light complementary industry, in particular to a fishing light complementary photovoltaic mounting bracket.

Fish-Light Complementary Solar Mounting Solution The Solution meet both fish farming and lighting energy demands efficiently.
