

NextNRG has secured a long-term lease option on 1,600 acres in Nassau County, Florida for the potential deployment of a 200 MW smart microgrid.

The village of Simris, in southern Sweden was looking to locally produce renewable energy but needed a way to store and utilise the energy.

In Orlando, Florida, industry leaders, technology innovators, and policymakers will convene to discuss the real-world applications, challenges, and breakthroughs that will define the next era of energy.

One way to handle the issue is by implementing local energy systems called microgrids. This thesis proposes a projection concerning the development of the Swedish regulations and if the society of a ...

The company's mission is to install 1 TWh of rooftop solar across Sweden, with its microgrids supplying at least 5% of the country's electricity within the next five years.

Companies looking to thrive in Sweden must prioritize localized strategies, ethical branding, and compliance with data and environmental regulations.

For this pilot project, the small village of Simris in the south of Sweden can be connected and disconnected from the main grid in a seamless way while being sourced by times solely by ...

In order to explore new business models and technologies to diversify the region's resource mix and reliance upon large-scale hydro resources, the large European utility E.ON deployed a microgrid in ...

When exploring the Microgrid industry in Sweden, several key considerations come into play. The regulatory framework supports the integration of renewable energy sources, aligning with Sweden's ...
