

A milestone in this revolution comes in the form of the new system inaugurated at the Son Orlandis photovoltaic power plant in Mallorca: it is the Enel Group's first vanadium flow battery in Spain and ...

The battery to be deployed will be H2's newly developed modular flow battery, EnerFLOW 640. H2 describes VFB technology as being superior to lithium-ion batteries in terms of ...

Battery energy storage in Port of Spain isn't just about technology - it's about building a resilient, cost-effective energy future. Whether you're a facility manager or energy planner, now is the time to ...

Spanish ports are becoming a battleground for storage tech. CATL's new 20MW lithium installation in Bilbao boasts 92% efficiency, while upstart Volterion's vanadium flow batteries promise 25-year ...

With a production capacity exceeding 330 MWh in South Korea and proprietary flow battery technology developed in-house, H2 Inc. is poised to expand its footprint in the European ...

The project aims to offer a long-duration energy storage (LDES) solution capable of providing energy backup for up to 8 hours. It is expected to utilize H2's newly developed modular ...

With advancements in technology and declining costs, the Spain flow battery market is expected to expand rapidly, offering opportunities for both domestic and international players in the energy ...

The technological landscape of the Spain organic flow battery market is rapidly evolving, driven by innovations in automation, AI-driven analytics, and IoT integration.

The Swedish automaker freezes operations at its battery joint venture due to lack of a technology partner. This decision comes as several European battery projects face similar difficulties against ...

On January 25th, EDP, a Portuguese based utility company, was approved to deploy a 1MWh vanadium flow battery system as part of a hybrid energy storage project at a soon to be decommissioned ...
