

France's new solar power station generates electricity

Axpo, through Urbasolar, commissions France's largest rooftop solar power plant in Beauvais. Covering an area of 62,000 square metres, the plant boasts a capacity of 12.8 MWp. This capacity will ...

The rise in clean energy supplies came despite year-over-year drops in wind and hydro power production, which were offset by record solar generation and the highest nuclear power output ...

EDF Renouvelables and ArcelorMittal Industeel have officially opened a new solar power plant in the commune of Châteauneuf (Loire, France).

They generate about 70 per cent of France's electricity and enable it to export vast amounts of low-carbon electricity to neighbouring countries.

RWE has commissioned four new wind farms and one solar power plant across France this summer, adding a total of 83 megawatts (MW) of renewable energy capacity.

Over the summer, RWE commissioned four new wind farms and one solar plant with a total installed capacity of 83 megawatts (MW) in France.

This map shows the distribution of wind and solar photovoltaic power generation facilities in mainland France, aggregated by French department. The values displayed contain a partial estimate of ...

Built on 127 hectares of former gravel pits, the park comprises over 135,000 photovoltaic modules installed on state-of-the-art floating platforms developed in France. With a total capacity of ...

RWE has expanded its renewable energy portfolio in France with the commissioning of a new solar plant in Sourdun, Seine-et-Marne. The 16-megawatt (MW) facility, coupled with a 4 MW ...

The plant features over 135,000 solar panels mounted on cutting-edge floating platforms, all designed and built in France. This ambitious project will generate enough electricity to meet the ...
