

Georgia Backup Power Storage

Georgia Power has commenced construction on 765 megawatts (MW) of new battery energy storage systems (BESS) across four counties in Georgia, aiming to significantly enhance grid reliability, ...

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report. Most of the new ...

As of late 2025, Georgia hosts approximately 146 MW of operational battery energy storage capacity, with another nearly 4,000 MW under construction, approved, or in development across its utility territories.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and ...

This solution achieved over 34% reduction in peak power demand and shifted more than 200kWh of energy daily, delivering cost savings and enhanced grid flexibility.

ATLANTA, Oct. 20, 2025 /PRNewswire/ -- Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County,...

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour period, adding resiliency to the state's power grid and helping ...

As a part of an All-Source Request for Proposals (RFP), Georgia Power is currently seeking approval from the Georgia PSC of 10 new BESS facilities with a total capacity of 3,022.5 MW and two new ...

The utility recently announced that construction is underway on 765 megawatts of new battery energy storage systems located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.
