

# Germany's hybrid energy storage power plant

Norwegian state-owned utility Statkraft AS has announced plans to construct a 47-MWp solar park with battery storage in Saxony-Anhalt, Germany. The project, named Zerbst, is set to be ...

Statkraft has commissioned a hybrid power plant consisting of photovoltaics and battery storage in Zerbst in the district of Anhalt-Bitterfeld (Saxony-Anhalt). According to the company, this is "the ...

The Zerbst hybrid plant demonstrates practical integration of large-scale solar generation with utility-scale storage, delivering both renewable power and essential grid-support services in one ...

Statkraft, thought to be Europe's largest producer of renewable energy, has commissioned Germany's largest solar battery storage hybrid power plant under the country's ...

The plant has been feeding energy into the grid since October 2025. The renewable hybrid power plant in Zerbst is the first of its kind for Statkraft - developed in-house and connected to ...

Commissioned in late 2025, this is Germany's largest hybrid solar-storage project: a 47 MW solar park paired with a 16 MW / 58 MWh Fluence BESS.

Norwegian state-owned utility Statkraft AS has commissioned the Zerbst solar-plus-storage project in Saxony-Anhalt, Germany, which combines 46.4 MW of power-generating capacity ...

The modern, EUR 45 million hybrid power plant was built on about 41 hectares of the former gravel pit. The 46.4-megawatt solar farm generates almost 50,000 MWh of green electricity ...

Statkraft has commissioned Germany's largest solar battery storage hybrid power plant in Zerbst under the Renewable Energy Sources Act (EEG). The project, developed in-house, marks ...
