

GoodWe's Arctic Tile Photovoltaic Panels

These tiles combine robust safety certifications, structural waterproofing, and hurricane resistance with easy installation and long service life -- making them ideal for villas, hotels, and public buildings ...

The ultra-lightweight design makes it possible for roofs with a low load-bearing capacity to install PV systems compared with conventional PV modules, catering to more application scenarios.

Featuring improved roof ventilation and heat dissipation, as well as fast installation, the Sunshine tiles can not only improve solar power generation efficiency, but also help households lower energy costs ...

The Sunshine Series is made up of extra tough solar roof tiles with integrated photovoltaic cells, compatible with normal roof shingles, easy to install.

With its efficient power generation of green energy and strict compliance with green building assessment standards, GoodWe's new solution is empowering users towards carbon neutrality.

GoodWe BIPV products include integrated solar roof tiles, ultra-lightweight modules for commercial and industrial use, and waterproof panels for carports.

GoodWe's PVBM products adapt to diverse structures, renowned for durability, rapid deployment, and high efficiency, driving progress in both construction and solar sectors.

The image shows photovoltaic solar panels designed in the shape of roof tiles, intended for Building-Integrated Photovoltaics (BIPV) projects, from the Chinese company GoodWe.
