

Has wind blade power generation been stopped

Vineyard Wind 1 can continue to generate power from its already operational turbines during the 90-day suspension. State leaders and lawmakers have criticized the pause, calling it an ...

Construction and power generation at the project remains halted. The company is still cleaning up the debris, some of which washed up on Martha's Vineyard earlier this week.

WASHINGTON -- The Trump administration said Monday it is pausing leases for five large-scale offshore wind projects under construction along the East Coast due to what it said were ...

One of the planned 62 turbines about 14 miles off the Vineyard coast is in operation for the first time since the 351-foot blade snapped in half in July, resulting in a total shutdown of the project.

After 20 or so years of production, most turbines are decommissioned. Many metals in the electronics, gearbox, generator, nacelle, and tower can be recycled. The concrete foundation is ...

In one of its final acts, the Biden administration's Bureau of Ocean Energy Management and Bureau of Safety and Environmental Enforcement completed the review and approved the ...

The project has not been generating power for more than three months after a July 13 incident in which a blade shattered and then fell into the sea.

Following the failure, the Bureau of Safety and Environmental Enforcement (BSEE) issued a suspension order that directs Vineyard Wind to halt any power production operations or new ...

Vineyard Wind, the nation's first large-scale offshore wind farm, was shut down by the federal government on Tuesday after a turbine blade failure sent thousands of pieces of debris into ...

Many first- and second-generation turbines with capacities between 0.5 and 1 MW are being retired and decommissioned as newer models--some with capacities of up to 3.5 MW--take ...
