

High-Temperature Power Cabinets for Data Centers

The Vertiv™ SmartMod™ HDX is addressing this need with a simple, scalable data center design that uses pre-engineered Vertiv™ building blocks to create a full solution - the Power Module, IT Hall ...

The Energy Efficient Data Center Cabinet System can be seamlessly integrated with all elements of the Panduit Intelligent Data Center Solution, including Overhead Cable Pathway Systems, High Speed ...

DDC Solutions offers ultra-high-density data center cooling that lowers total cost of ownership through its dynamic management software and patented cabinet technology.

High-density data centers need IT cooling solutions that can handle high thermal loads, help optimize the use of space, and conserve energy consumption and costs.

Designed for both standard and custom configurations, these panels allow fast, safe integration of portable generators or load banks during power outages or maintenance. By enabling rapid ...

Push beyond the limits of traditional data center cooling with DDC S-Series, patented cabinet technology that supports GPU, HPC, and AI infrastructure with ultra-high-density air and liquid to chip ready ...

ASHRAE TC9.9 Data Center Power Equipment Thermal Guidelines and Best Practices Whitepaper created by ASHRAE Technical Committee (TC) 9.9 Mission Critical Facilities, Data Centers, ...

Our cabinet technology helps modernize data centers with more modular, scalable, flexible, and efficient solutions by delivering intelligent power management, real-time environment monitoring, and ...

Our DC Series is the Data Center Standard for high-capacity, high-weight load rated, feature rich cabinets.

Cabinet systems that use a modular, holistic approach to integrating thermal and power management facilitate cost-effective scalability for data centers to support increasing rack power densities while ...
