

Industrial Uninterruptible Power Supply in Bosnia and Herzegovina

What happened to the power system in BiH after the 1992-1995 war?

After the 1992-1995 war, the once-unified power system in BiH was divided into three vertically integrated companies split along geographic/ethnic lines.

How is electricity generated in BiH?

Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh. BiH historically had a comparative advantage in electricity, particularly because of its natural hydropower resources and coal reserves.

Will Yugoslav-era coal-fired plants in BiH age out?

Most of the Yugoslav-era coal-fired plants in BiH will age out of their useful life in the next 5-10 years; thus, BiH is looking for opportunities to upgrade existing infrastructure and build new infrastructure primarily in hydro and wind power but also in coal.

What is electric power generation in BiH?

Electric power generation is a key sector of economic activity in BiH. Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh.
