

Ireland solar wind power storage project

Renewables-giant Ørsted is set to sell its European onshore renewable energy business to Copenhagen Infrastructure Partners in a EUR1.4bn deal. The Cork-headquartered unit develops and ...

Last September, Statkraft announced that it planned to build and co-locate Ireland's first four-hour grid-scale battery energy storage system (BESS) with its 56MW Cushaling Wind Farm, ...

Battery power has the potential to provide secure, affordable, clean power to thousands of homes when the sun isn't shining and the wind isn't blowing, according to a report by Energy ...

Ireland needs more of both - wind farms and solar farms - and it needs them faster, especially now that the post-coal era here has well and truly begun.

Wood MacKenzie predicts that Ireland will meet its 8 GW 2030 solar target but wind, heat pumps, and electric vehicles (EVs) are all lagging behind theirs.

He notes that four projects were successful in the Government Offshore Renewable Electricity Support Scheme (ORESS) auction in May 2023, and while five of the six phase-one ...

Construction is underway by Statkraft at Ireland's first 4-hour grid-scale battery energy storage system (BESS) in County Offaly, in Ireland's midlands. The 20MW, 4-hour BESS solution is ...

Energy Storage: Ireland has already brought over 1GW of battery storage onto the grid. This capacity is vital for balancing supply and demand, storing excess solar power generated during ...

The deployment and connection of wind and solar energy generation at pace and at scale and the development of our electricity grid will benefit communities, households and businesses and ...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a combined capacity ...
