

It is illegal to install solar panels yourself

Are solar panels illegal?

Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.

Can I install solar panels on my own property?

Technically, yes--you're allowed to install solar panels on your own property. However, it must still comply with building regulations, electrical safety standards, and local planning rules. Most domestic installations fall under Permitted Development Rights, so planning permission isn't usually needed.

Should you install solar panels without a permit?

Don't skip this crucial step - installing solar panels without proper permits can result in fines, mandatory system removal, or complications when selling your home. Many localities also require certification of your installation by a licensed electrician, even if you do the main installation work yourself.

Do you need an electrician to install solar panels?

Most states allow homeowners to install solar panels themselves, provided they obtain proper permits, follow local building codes, and pass required inspections. However, any electrical connections to the power grid must typically be completed by a licensed electrician.
