

Large-scale distributed energy storage in Georgia

State resourcing plans are increasingly updating battery energy storage systems (BESS) plans, especially those tied to solar.

We work closely with Georgia's universities to identify cutting-edge research regarding energy storage and provide companies with access to the latest applied research. We connect companies to ...

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, ...

Battery energy storage is taking center stage in Georgia's utility planning, as Georgia Power moves forward with more than 765 megawatts of new storage capacity across Bibb, Lowndes, ...

At the heart of this transformation is Georgia Power's 2025 Request for Proposals (RFP) for 500 megawatts (MW) of grid-scale battery storage, a move that underscores the strategic ...

The Georgia Public Service Commission (PSC) has signed off on Georgia Power's plans to build 500 megawatts (MW) of battery energy storage across four locations, voting unanimously to ...

The tender builds on Georgia Power's broader ambition to deploy more than 1.5 GW of battery energy storage systems (BESS) over the coming years, an expansion approved by the ...

Utility regulators on Tuesday approved Georgia Power's 2025 integrated resource plan, which calls for keeping coal plants online to serve anticipated data center demand. It also includes ...

Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by 2027, outpacing every other Southeastern state. Driven by economic growth and evolving grid ...

In a decisive move to bolster its clean energy capabilities, Georgia Power has announced a request for proposals (RFP) to procure 500 MW of energy storage, with a minimum capacity of 500 ...
