The project will comprise a 65 MW solar park and a 92 MWh battery energy storage system (BESS) across approximately 96 hectares. Once operational, it will be among the most ...

Latvian power storage manufacturers are reshaping Europe"s renewable energy landscape with cutting-edge battery systems and grid stabilization technologies. Discover how these solutions support solar, ...

Riga, Latvia - Slovenia"s NGEN Group is making a meaningful push into the Baltic energy market with a substantial investment in Latvia. The company is poised to acquire a battery energy ...

It was announced on February 3rd that the Slovenia-based energy company NGEN Group is entering the Latvian market with what it says is& nbsp;a& nbsp;EUR50 million investment.

Latvian energy storage projects are gaining momentum as the country accelerates its transition to renewable energy. This article explores key players, emerging technologies, and market trends ...

Discover how Latvia"s innovative energy storage initiatives are reshaping grid stability and renewable integration. This deep dive explores technical breakthroughs, market trends, and the strategic ...

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the ...

With EU directives pushing for 45% renewable integration by 2030, the Baltic state faces a make-or-break moment. Enter energy storage containers - the Swiss Army knife of modern power management.

NGEN group is a Slovenia-based energy company specializing in energy storage and flexibility solutions, developing energy storage projects and market flexibility solutions in various ...

Energy storage systems are an essential element of Latvia"s path towards a sustainable and energy-independent future. The importance of these technologies is being recognized and ...
