

Lesotho microgrid development

The EU-funded ElectriFI, managed by EDFI Management Company (EDFI MC), today announced a new LSL 40 million investment in Sotho Minigrid Portfolio, a project company set up for ...

The move coincided with OnePower's successful bid to develop the first utility-scale solar project in Lesotho, a 20-megawatt project that will sell electricity to Lesotho's central grid in addition to ...

As the population increases in the community, the mini-grid is connected to new households consistently. One of the key features of the Motete project is the tailored set of productivity ...

The second and much larger phase of a pioneering solar mini-grids project in Lesotho is underway after the Camco-managed Renewable Energy Performance Platform (REPP) and co ...

Unlike its African neighbours, Lesotho has no minigrids installed. This project aims to introduce minigrid technology into Lesotho, and demonstrate that they can be a superior sustainable solution for rural ...

As of May 2022, OnePower is rolling out 10 mini-grids in Lesotho based on a structured and optimized schedule. Rather than looking at each minigrid in isolation, OnePower has bundled construction and ...

Public lighting will also increase the social fibre in the community. The combination of a social community based model combined with a high quality solar system makes it a pioneering project in ...

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

Lesotho is expanding energy access through a new mini-grid regulation that promotes private investment, strengthens rural electrification, and supports sustainable development across ...

There is growing interest and investment from the private sector and development partners to scale up deployment. The regulatory framework is also starting to take shape, but more ...
