

More than a dozen solar power generation

There are over 5 million solar installations in the United States, delivering clean, affordable, reliable energy to American communities. Read SEIA's Press Release on this historic milestone.

Bankruptcy court approves tech giant's acquisition of solar power storage site Pine Gate Renewables owns more than a dozen solar power farms in Oregon. (Pine Gate Renewables)

Dominion Energy proposed in its annual clean energy filing with the Virginia State Corporation Commission (SCC) more than a dozen new solar projects for Virginia customers.

Solar (photovoltaic) panels cumulative capacity Solar and wind power generation Solar energy generation by region Solar energy generation vs. capacity Solar photovoltaic module prices vs. ...

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the second half of the ...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 gigawatts (GW) of ...

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the ...

This report uses data from the EIA to analyze solar and wind capacity and generation over the past decade (2014 to 2023) in all 50 states and the District of Columbia.

Solar electricity is poised to dominate America's energy expansion in 2025, with developers planning to add 33 gigawatts (GW) of solar photovoltaic capacity - representing more than half of the 64 GW ...
