

The team developed a thermoregulatory clothing system that combines an organic photovoltaic module with bidirectional electrocaloric devices that are capable of heating or cooling.

In the new work, scientists say that the system could be integrated into conventional clothing. Once it is added in, the device can provide 10.1 degrees Celsius of cooling, but also keep it ...

This innovation transforms clothing into a personal air conditioning system, facilitating the body's adaptation to ambient temperature changes. With climate change altering traditional extreme ...

This paper investigates the potential of solar air-conditioning systems in Morocco (enjoying different climates) through a comparative study between conventional and solar closed cycle processes ...

Wang and associates developed a tiny wearable material in their work by attaching a flexible solar cell to a flexible electrocaloric module. The latter is a device that reacts to applied ...

Authentic Moroccan Clothing. We sell Djellabas, Qandouras, all made in Morocco.

We specialize in handling OEM/ODM orders, especially Kids Motorcycle, Solar Panel etc. Just email us your creative design or your interested products of us, we can help you to realize what you want in a ...

The trend I'm referring to is Air Conditioned Clothing and on a whim I decided to find out whether someone could, if patient and sweaty enough, put together an entire air conditioned outfit ...
