

# No 1 in solar module exports

Among solar exports, exports of photovoltaic modules dominated accounting for 97.7% of the total shipments, while solar cells accounted for the remaining 2.3%.

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

Below, you will find a list of the 15 best exporters of solar power sorted by highest international sales. The top exporters shown above generated 94.7% of all solar power components sold on international ...

India's solar modules export rose 20.5 per cent year-on-year in the first four months of the ongoing fiscal to \$668 million and 30 per cent in volume terms to 4.6 million, led by shipments to the ...

India's solar module exports rose 30.7% in April-October 2025, driven almost entirely by US demand, with emerging traction in new secondary markets across Asia, Africa, and beyond.

Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include volumes in peak kilowatts and average prices. Where possible, imports and ...

China exported 17.34 GW of modules in October, up nearly 5% MoM from 16.53 GW and up 5% YoY from 16.45 GW, according to InfoLink's customs data. China exported 204.11 GW of ...

Australia's solar exports have reached new heights in 2024, with the country exporting both solar panels and clean electricity through underwater cables to Singapore and Indonesia.

Over 107 countries contribute to the global export of Solar Module, China is the largest exporter of Solar Module, it's contribution of 103,827 export shipments attests to its significant market share of 35%.

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and FY2024, primarily to the US, which accounted for more ...
