

Outdoor solar power hub data

Current and historical solar resource data and tools to support the integration of solar technologies on the grid. For the most up-to-date solar data, tools, and maps, visit [Geospatial Data ...](#)

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download [...](#)

National Solar Radiation Database (NSRDB): This dataset provides hourly solar radiation and meteorological data for locations in the United States and its territories.

Berkeley Labs "Utility-Scale Solar", 2024 Edition presents analysis of empirical plant-level data from the U.S. fleet of ground-mounted photovoltaic (PV), PV+battery, and concentrating solar [...](#)

The Solar Gateway acts as the central hub for collecting and transmitting data from submetering devices powered by solar energy. It ensures efficient communication between utility meters--such as water, [...](#)

NASA POWER's Dependable Data Ensures Dependable Energy for U.S. Utility Company Reliable solar and weather data provides accurate performance monitoring for 360 community solar garden [...](#)

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, in most parts of the world.

We hold information on most of the utility-scale solar photovoltaic power plants in operation around the world and many of those under development, where they meet our criteria.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 [...](#)

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, [...](#)
