

Outdoor solar power hub industry in 2025

According to global energy reports, solar power capacity has more than tripled over the last decade, with 2025 projected to be a record-breaking year. Falling costs of solar technology, government ...

After years of exponential growth in global solar buildout could policy uncertainty, protectionist measures and interconnection and transmission bottlenecks halt that trend in 2025? Read our view of the ...

Nearly 50 GWdc are expected to come online in 2025, and almost 44 GWdc in 2026; then, annual installations will stabilize around 38-39 GWdc annually from 2027 to 2030. However, the sector has greater ...

Across all regions, developing a skilled workforce and setting ambitious solar and storage targets are essential tasks. In these times of political uncertainty, low-cost solar power could turn into the key tool ...

In 2025, we can expect to see groundbreaking developments originating from this region that are not just enhancing efficiency but also driving down costs. These advancements, including next-generation ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government programs supporting the solar industry.

According to Deloitte analysis of data tracked by S& P Global Market Intelligence, solar and wind capacity contracted to US data centers has grown to nearly 34 GW through 2024, representing close to half of all ...

o The resulting revenue uncertainty--which may slow PV growth after 2025 --will be greater for small-scale solar than for utility -scale solar, because small-scale projects had benefited more from fixed ...

Now more than ever, it is apparent the increasingly resilient solar and storage industry will continue to adapt and meet the growing demand for renewable energy systems nationwide, no matter the ...

As of September 2025, deployment numbers are soaring to new highs, yet industry players also face challenges like policy uncertainty, financing hurdles, and supply chain adjustments.
