Where in the Philippines will a solar power plant be located?

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS).

Why is the Philippines launching a new LNG facility?

The trio is launching this LNG facility in a move that is seen as a landmark development for the Philippines' energy sector in line with the Marcos administration's push for more natural gas in the country's energy mix. The project is expected to make competitively priced and affordable power accessible to a broader base of Filipino consumers.

What is the impact of a solar power project in the Philippines?

The project has strong sustainability credentials, notably because of its impact in decarbonising the Philippines' energy system (SDG7), but also by generating power to support economic development (SDG8), creating more than 10,000 new jobs (SDG8), and facilitating local development (SDGs3+4).

How will the Philippines achieve energy security?

The Philippine government envisions the Philippines will increase its renewable energy (RE) share in supply mix to 35% by 2030 and 50% by 2050, promote energy efficiency and conservation, and pursue emerging technologies to achieve energy security.

The Philippines' December 2024 Integrated Nuclear Infrastructure Review mission and release of its Nuclear Energy Roadmap show how shared learning and institutional preparation can ...

Manila: In a bold move to ramp up its renewable energy ambitions, the Philippines launched a \$3.4-billion solar power and battery storage project has been kicked off north of the capital.

Three players are setting in motion the Philippines' first integrated liquefied natural gas (LNG) facility in Batangas.

MGEN's affiliate, Terra Solar Philippines, Inc. (MTerra Solar), is also pushing forward with what is set to be the world's largest integrated solar photovoltaic and battery energy storage ...

The Terra Solar Project will provide electricity to circa 2.4 million Philippine households² The transaction represents the largest foreign direct investment for a greenfield infrastructure project ...

The PEP is a comprehensive roadmap of programs and projects of the energy sector to ensure sustainable, stable, secure, sufficient, accessible and reasonably-priced energy.

The Philippines has made significant progress in delivering electricity access, boosting the household electrification rate past 90% in 2016. The country is on track to meet the target of ...
