

Photovoltaic panel cleaning machine patent

Abstract: ABSTRACT SOLAR PANEL CLEANING MACHINE The present invention discloses a solar cleaning machine for cleaning a solar panel, the machine comprising at least two bases (1,2) ...

A cleaning machine, photovoltaic panel technology, applied in the direction of cleaning flexible objects, cleaning methods and utensils, cleaning methods using tools, etc., can solve the ...

The photovoltaic panel cleaning machine provides for the automated cleaning of photovoltaic (PV, or Solar) panels using both pneumatic blowing and mechanical brushing or scrubbing to remove ...

A photovoltaic panel cleaning machine for a linear array of photovoltaic panels, the machine comprising: a frame movably disposed upon the photovoltaic panels; a plurality of panel cleaning elements ...

[0001] The present invention relates to a system for cleaning the surface of the solar panel array and more particularly, it relates to a self powered and timer based solar panel cleaning ...

The photovoltaic panel cleaning machine is installed upon a linear array of photovoltaic (solar) panels, automatically operating periodically to remove any dust, debris, and/or light condensation from the ...

[0001] The present invention relates generally to a machine able to clean photovoltaic and solar panels.

The present invention relates generally to photovoltaic or solar panels, and particularly to an automated photovoltaic panel cleaning machine for periodically removing dry dust, debris, and/or moisture ...

According to the present invention, a solar panel cleaning system and method is provided for cleaning solar panels of a plurality of solar row.
