

Photovoltaic solar panel rack

What is a solar panel racking system?

A solar panel racking system, or solar panel mount, is a structure that safely fixes the solar panels to various surfaces such as rooftops, ground surfaces, or pole installations. Racking systems typically include aluminum or steel components designed to securely hold solar panels in place.

What is racking & mounting a solar PV system?

Racking and mounting can often be the most complicated portion of a solar PV system installation. The racking is the foundation of the system- it protects the modules, the roof and people over a lifetime that can exceed 25 years.

Does solar racking work on a roof?

Proper solar racking safely affixes solar panels to buildings, so your racking system must be compatible with your roof. The essential components of a solar racking system include flashings, mounts, rails, and clamps. The top solar panel racking brands include SnapNrack, Unirac, IronRidge, Quick Mount PV, EcoFasten, and AllEarth Renewables.

What are the components of a solar racking system?

The essential components of a solar racking system include flashings, mounts, rails, and clamps. The top solar panel racking brands include SnapNrack, Unirac, IronRidge, Quick Mount PV, EcoFasten, and AllEarth Renewables. Aesthetics, leak protection, wire management, and ease of installation all factor into racking system design.
