

Portable power bms solution customization

At Promwad, we design custom BMS hardware and embedded software for Li-ion, LiFePO4, and other chemistries, optimised for your application's performance, capacity, cost, and safety requirements.

What sets Tritex apart from other custom BMS manufacturers? With over 100 engineers and more than 15 years of expertise in battery management system design, R& D, and manufacturing, Tritex offers ...

CM Batteries has designed hundreds of BMS solutions for our customers. Each custom battery pack solution has their unique working mode and request for electronic performance.

We offer professional BMS customization services, covering hardware design, firmware algorithms, communication protocols, enclosure structure and full-process support. Tailored for electric bikes, ...

Explore our advanced BMS (Battery Management System) capabilities, designed to optimize performance, safety, and efficiency in energy storage solutions. We provide customized BMS ...

Looking for battery management system (BMS)? We design and customize battery management systems to satisfy your application requirements.

Our expertise has produced numerous products widely used and trusted in various industries, including unmanned aircraft systems, R/C hobbies, consumer electronics, medical devices, portable power ...

Whether you need a fully tailored BMS designed from the ground up or a pre-engineered solution that can be quickly integrated and customized for your specific needs, we have the expertise to deliver.

We offer customizable services including feature configuration, series-parallel optimization, and wide-temperature adaptability design to ensure safe and reliable battery management.

Our process for creating custom battery management systems begins by developing BMS modules and custom BMS boards that manage your project's voltage, current, temperature, and data ...
