

# Price of solar power generation to the national grid

For solar power, LCOE currently ranges from \$30 to \$60 per megawatt-hour, which is competitive compared to traditional energy sources such as coal or natural gas. This affordability can ...

Solar and wind power have become increasingly cost-competitive over the past decade, prompting claims that they are now the cheapest sources of new electricity. Federal and state ...

Solar energy cost and data analysis examines technology costs, location-specific competitive advantages, and assesses the performance of solar energy.

2024 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a base year of 2022. The Base Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance ...

Comprehensive 2025 guide to renewable energy costs. Compare solar, wind, and clean energy pricing vs fossil fuels. Includes latest LCOE data, trends, and projections.

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Depending on the local regulatory environment, some or all wholesale costs may be passed through to consumers. These are costs per unit of energy, typically represented as dollars/megawatt hour ...

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop ...

Prices have ticked upward slightly in 2025 due to tariffs and a rush for solar before the 30% consumer solar tax credit expires on December 31, 2025. As a general trend, we expect U.S. solar prices to ...

Find statistics on electric power plants, capacity, generation, fuel consumption, sales, prices and customers.
