

The company produce all kinds of cold-formed molding equipment and high precision profile roll forming machine. Ruifu has a wealth of design and production experience, has a design, manufacturing as ...

The series of Hangzhou Roll Forming Technology"s solar PV support forming machines can produce double-in-roll c-shaped steel photovoltaic brackets with consistently high quality at a stable speed.

Photovoltaic mounting equipment is divided into three categories according to the installation ground: one is a sloping roof photovoltaic system, the other is a flat roof photovoltaic system, and the third is ...

Company leading products have water pumps, environmental protection equipment, electrical equipment, a total of more than 1600 varieties of specifications; with novel, efficient, energy saving, ...

The automatic production line for cold bending and punching of photovoltaic support adopts fully automatic control, which greatly improves production efficiency and reduces labor intensity.

Website Description:Shanghai Sihua Precision Machinery Co., Ltd. mainly sells solar photovoltaic bracket equipment, automobile anti-collision beam equipment, baking paint keel machine, partition ...

The tracking photovoltaic support system consisted of 10 pillars (including 1 drive pillar), one axis bar, 11 shaft rods, 52 photovoltaic panels, 54 photovoltaic support purlins, driving devices and 9 sliding ...

This equipment can efficiently and precisely process steel strips into standard C-type supports, improving production efficiency and ensuring the strength and stability of the supports.

The solar bracket installation pillar channel rolling forming machine (updated version), also known as the seismic photovoltaic (PV) frame rolling forming machine, is used for installing, supporting, supporting, ...

Its main function is the special equipment designed and installed from the solar photovoltaic power generation system to support, fix and rotate photovoltaic modules. It is a new energy industry among ...
