

SmartArc Outdoor Power Supply

What is Ushio hbx-76 smartarc power supply?

Ushio HBX-76 SMARTARC Electronic Power Supply (5001474) - a compact, intelligent solution for short arc mercury and xenon DC lamps. Features digital power management, microprocessor control, wide voltage input (90-264VAC), and built-in protection for reliable lamp operation.

What is Ushio smartarctm electronic power supply?

Ushio's SMARTARCTM electronic power supply with digital power management and microprocessor controls is a compact and "intelligent" solution for operating DC operated arc discharge lamps. Power Factor Corrected Line Input, Built-In EMI-Filter Voltage Range 90VAC to 264VAC. Meets CE & FCC Part "A"

What type of DC short arc discharge lamp does EMARC smr200 use?

Operates 100W to 200W DC short arc discharge lamps such as EmArc SMR200, HTL 38465, HXP R120 and others. (Call to verify compatibility.) Operates various EmArc; HTL and HXP R type DC short arc lamps in power ranges between 100W-200W and operating voltages between 36V-98V.

What voltage does a EMARC ; HTL/HXP R-Type dc short arc lamp operate?

Operates various EmArc; HTL and HXP R type DC short arc lamps in power ranges between 100W-200W and operating voltages between 36V-98V. Output selections are adjustable in 6 steps via solder bridges (call for details). Power factor corrected line input with built-in EMI filter. Wide input voltage range: 90VAC to 264VAC.

Ushio's reliable SMARTARC(TM) electronic power supply with digital power ...

The USHIO SMARTARC(TM) ELDC 2.31 is a compact electronic power supply designed for EmArc; DC arc discharge lamps. Featuring digital power management and microprocessor controls, it delivers ...

Ushio's reliable SMARTARC(TM) electronic power supply with digital power management and microprocessor controls is a compact and "intelligent" solution for operating DC powered arc ...

The Ushio ELDC 2.31 power supply operates EmArc DC lamps between power ranges of 100W-200W, and operating voltages between 36V-98V.

Ushio HBX-76 SMARTARC Electronic Power Supply (5001474) - a compact, intelligent solution for short arc mercury and xenon DC lamps. Features digital power management, microprocessor control, wide ...

Power Supply For EmArc; Lamps Ushio's SmartArcTM electronic power supply with digital power management and microprocessor controls is a compact and "intelligent" solution for ...

Ushio offers EmArc electronic power supply and Solarc Ballasts.

Ushio's SMARTARC(TM) electronic power supply with digital power management is a compact &

SmartArc Outdoor Power Supply

intelligent solution for operating DC powered arc discharge lamps.

SmartArc PPC Console and 360RU Power Supply When used with Oerlikon Metco's extensive portfolio of high quality wire arc materials, SmartArc delivers superior coat-ings, at high ...

Due to hot restrike capabilities of the power supply, the output voltage to the lamp can reach 15,000 volts. Ensure a minimum 15mm (>1/2") clearance between all lamp terminals to the ...
