

Solar Photovoltaic Power Generation Lease Contract

What is a solar lease agreement?

A solar lease agreement is a document you use to lease out solar power and equipment to another party. This template lets you create a residential or commercial solar lease agreement for either the buyer/client or the Power Provider/developer. However, generally, the developer provides it, and it helps ensure financial certainty for both parties.

Do you need a solar power lease agreement?

A solar power lease agreement is a good option if you want to start using solar energy but don't have the initial capital to install the system. In these cases, it's the company's responsibility to design, install, and maintain the entire system. The client will then pay a fixed monthly rate for the power produced by the system.

What is a solar energy agreement?

For this guide, "solar energy agreement" will refer to the document or documents that work together to govern the relationship between the landowner and the party (or parties) constructing and operating the solar power project. These agreements are sometimes called "solar leases," "solar easements," or "solar power contracts."

What is the difference between a PPA and a solar lease agreement?

In a PPA, you buy the net amount of solar power you use from the meter at a fixed rate per kWh. However, with a solar lease agreement, you generally pay a fixed monthly amount. That monthly amount allows you to use all the output energy the solar equipment generates.
