

Find the most up-to-date statistics about the solar photovoltaic industry in Italy

Italy Installs 6.4 GW of Solar in 2025, Cumulative Capacity Reaches 43.5 GW Italy deployed 6,437 MW of new PV capacity in 2025, according to new data released by Italian grid ...

Italy is one of the most outstanding countries in Europe and the world when it comes to renewable energy production. After hydroelectric power, solar energy is the star performer of our green energy ...

MILAN, Jan 21 (Reuters) - Italian solar power production rose 25% last year compared with 2024 to a new record of 44.3 terawatt hours (TWh), the country's power grid operator Terna (TRN.MI)...

Italy's solar energy sector is experiencing a significant surge, solidifying its role as a key player in Europe's renewable transition. Between January and August 2025, the country installed an ...

Italy has reached a milestone in its solar energy production. According to data published by Terna, the national grid operator, photovoltaic production reached 44.3 terawatt hours (TWh) in ...

In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 ...

The entire nation of Italy retains high potential for solar energy production, ranging from 3.6 kWh per square meter per day in the Po river plain to 5.4 kWh per square meter per day in Sicily.

According to data processed by Italia Solare based on Terna's Gaudì database, Italy has achieved a significant milestone by exceeding 2 million photovoltaic (PV) systems connected to the ...

Key growth drivers include accelerating additions of distributed rooftop PV supported by net metering and simplified permitting, declines in PV system costs, and national targets to expand renewable ...

Solar system production in italy
