

# Sri Lanka outdoor power supply production and processing factory

The ancient Sinhalese used the monsoon winds to power furnaces as early as 300 BC, making Sri Lanka one of the first countries in the world to use wind power. Evidence of this has been found in ...

Sri Lanka's electricity demand is currently met by nine thermal power stations, fifteen large hydroelectric power stations, and fifteen wind farms, with a smaller share from small hydro facilities and other renewables such as solar. Most hydroelectric and thermal/fossil fuel-based power stations in the country are owned and/or operated by the government via the state-run Ceylon Electricity Board (CEB), while the renewable energy

Our mission is to leverage our knowledge and expertise in independent power production, engineering, procurement and construction, and the operation and maintenance of power plants.

We currently operate 6 hydropower plants in Sri Lanka. We reinforce our commitment to renewable energy generation through our strategic investments in solar power.

Lanka Nature Power (Pvt) Ltd, is a BOI approved venture geared towards planning, implementing and managing renewable energy projects with the rural communities in Sri Lanka.

Following the expiration of the Power Purchase Agreement, the IPP plant Sojitze (Kelanitissa) was acquired by CEB and recommissioned as a CEB-owned facility named KCCPS 2 (Kelanitissa ...
