

State Grid Microgrid Project

Caterpillar is deploying a 750-kW microgrid on the island of Guam--a challenging deployment environment because of the island power grid and extreme weather phenomena. To ...

Think Microgrid has prepared this initial analytic framework and assessment of state microgrid activities to provide a foundation for state-specific conversations and to share information across jurisdictional ...

This report will explain how microgrids operate, the ways in which they can support the reliability and resilience of the power grid and the policies state legislatures have adopted to support ...

Microgrids that incorporate renewable energy resources can have environmental benefits in terms of reduced greenhouse gas emissions and air pollutants. In some cases, microgrids can sell power ...

Based on Wood Mackenzie's microgrid project and market data, Think Microgrid evaluated states with respect to five areas of market maturity: deployment, policy, resilience, grid ...

.... 24 INTRODUCTION In 2035, microgrids will be the core building block of a modern grid, in which the U.S. Department of Energy (DOE) has envisioned that 30-50% of electricity generation will be served ...

Microgrids are groups of distributed energy resources, such as solar modules on a home, connected to a battery system, that can disconnect from the grid and operate independently during a ...

Although State Energy Offices and PUCs have different electric distribution system roles, each is interested in ensuring the safe, reliable, affordable, and beneficial deployment of resilience projects, ...

The report discusses three trends in grid modernization actions taken in Q2 2025: (1) states mandating procurement of energy storage, (2) lawmakers implementing rules governing ...

One of these solutions is microgrids that can disconnect from the grid and offer grid resilience during an outage. While this technology is still finding its footing in the industry, states ...
