

State Grid Small and Micro Enterprise Standards

Think Microgrid (2022) ranked microgrid state policies based on microgrid deployment, policy environment, resilience effort, grid services, and equity initiatives.

a meaningful solution for the operational needs of the state electric grid and the fundamental architecture of the grid supports robust contributions from distributed energy resources and microgrids.

More likely in states where state legislatures and/or regulators have signaled openness, but utility-led initiatives may become more feasible as demonstrable use cases for such projects grow throughout ...

Technical standards and interconnection processes for microgrids that allow stakeholders to integrate systems within and, at times, across utility service territories; and, An overarching framework that ...

Questions about regulatory oversight focused on whether and how the State should oversee micro-grid operation, micro-grid interactions with customers (e.g. billing, dispute resolution), and provision of ...

Think Microgrid has prepared this initial analytic framework and assessment of state microgrid activities to provide a foundation for state-specific conversations and to share information across jurisdictional ...

Wait, no - State Grid's asset portfolio exceeds \$600B. That's 40,000 times the medium enterprise threshold! So why does this misconception persist?

In our paper, we comprehensively review the standards development and current situation of microgrids and DER grid-integration issued by international organizations or individual countries.

When the main electric grid loses power, the microgrid goes into island mode (i.e., operates independently of the main electric grid) and serves its own customers with the generation and other ...

As a result, the National Association of State Energy Officials (NASEO) and the National Association of Regulatory Utility Commissioners (NARUC) created this framework to serve as a resource and ...
